

Professional Accounting (Graduate Certificate)

Meet our students

Our students learn a combination of theory and software skills, providing them with key experience that can be applied to the workplace. Through this program, our students are well versed in current accounting practices and the latest accounting software. This program gives students a clear pathway to becoming a Chartered Professional Accountant (CPA), and graduates can apply to the CPA's Professional Education Program (PEP).

Learn more about the classes these students take by visiting [the program webpage](#).

Core competencies and skills

- Formulating accurate and timely financial information using business applications software and information systems.
- Utilizing statistical techniques effectively in the analysis of financial information.
- Calculating and applying appropriate corporate finance measures to common financial and accounting management situations.
